REPORT ORGANIZATION AND SUMMARY OF FINDINGS

INTRODUCTION

The main purpose of the Survey was to determine vacancy rates and rental costs in multi-family rental dwellings in most cities and towns in Alberta.

The Survey covered 89 communities in the province of Alberta. Communities included in the Survey are generally those which have a population equal to or greater than 1,000 with 30 or more rental suites. A number of additional communities were included in this survey at the request of other government departments and agencies. The survey did not include Edmonton and Calgary, since vacancy and rental information on those two cities is gathered and reported by Canada Mortgage and Housing Corporation (CMHC). However, the report does include the following communities surveyed by CMHC in April 1990:

Cities: Airdrie, Camrose, Ft. McMurray, Ft. Saskatchewan, Grande Prairie, Leduc, Lethbridge, Medicine Hat, Red Deer, St. Albert, Spruce Grove and Wetaskiwin.

Towns: Brooks, Calmar, Cochrane, Crowsnest Pass, Devon, Drayton Valley, Morinville, Redcliff, Redwater, Sherwood Park and Stony Plain.

Except for the communities surveyed by CMHC in April, the remaining communities were surveyed by field researchers from the Market Analysis Section from May to August 1990. Data was collected using a pre-set questionnaire on the number and types of suites, vacancies, rent costs and the age of rental buildings. The survey covered non-subsidized rental buildings which have four or more suites. In buildings which include subsidized suites, only the non-subsidized suites were surveyed. Store-top structures which may have fewer than four suites, were also included because in many of the smaller communities, these types of rental structures accounted for a significant portion of the total rental stock.

REPORT ORGANIZATION AND SUMMARY OF FINDINGS

The following sections document the results of the 1990 Alberta Apartment Vacancy and Rental Cost Survey.

I: SUMMARY TABLES OF 1989 SURVEY RESULTS

Table 1 presents the estimated universe of rental units, the number of rental units surveyed and the survey response. The estimated universe was 41,103 of which 38,612 units were surveyed, for an average response rate of 93.9 percent. The response rate of 100 percent was recorded in 68 of the 89 communities surveyed. A further 8 communities had response rates of between 95 and 100 percent.

Table 2 contains the range of rental costs and the weighted average rent by type of suite for each of the cities and towns. The total city/town average rental cost for each unit type is also identified.

Table 3 identifies the number of vacant units and corresponding vacancy rates by age of building. The table also presents vacancy rates for individual cities and towns as well as overall vacancy rates. In the cities, vacancy rates ranged from 0.0 percent in Spruce Grove to 22.4 percent in Lloydminster. The vacancy rate for the towns ranged from 0.0 percent in 8 communities, including Coaldale, Nanton and Sylvan Lake, to 39.5 percent in Crowsnest Pass. The overall 1990 vacancy rates are summarized below along with comparative rates for 1988 and 1989.

OVERALL VACANCY RATES

	1988	1989	1990
Cities	9.8	7.6	5.9
Towns	11.1	7.9	6.9
Overall	10.2	7.7	6.3

As can be observed, the overall provincial vacancy rate dropped by 1.4 percent from 7.7 percent in 1989 to 6.3 percent in 1990. This change is consistent with the increased migration situation and the improved regional economy in Alberta.

The majority of Alberta's rental stock is over 10 years old. The vacancy rates in these structures average 5.5 percent, below the overall average, and below the average for structures 2-10 years old. In the cities, vacancy rates were higher in older buildings, ranging from 0.0 percent in 7-23 month old buildings to 6.0 percent in buildings over 10 years old. In the towns, vacancy rates were highest in 2-5 year old buildings (12.9 percent), slightly lower in 5-10 year old buildings (12.4 percent) and lowest in buildings over 10 years old (4.7 percent).

Table 4 identifies the number of vacant units and corresponding vacancy rates by type of building. Walk-up buildings represent the majority of the universe in both the towns and the cities. Historical overall rate comparisons are summarized below:

VACANCY RATES FOR CITIES AND TOWNS COMBINED

	1988	1989	1990
Four-plex	5.2	4.1	2.6
Walk-up	10.8	8.2	6.9
Row Housing	10.8	7.9	6.3
High-rise	10.1	3.6	1.2
Store Top	18.6	13.6	8.5
Other	9.1	8.1	8.6

Rates have dropped in all categories except 'Other' which increased slightly. Average Town vacancy rates were higher than City rates in all categories except 'Row Housing' (City rate - 7.8 percent; Town rate - 4.1 percent), and 'Store-Top' (City rate - 10.3 percent; Town rate - 8.1 percent).

Table 5 identifies the number of vacant units and the corresponding vacancy rate by type of suite. The number and percent of total universe by unit type is as follows:

Unit Type	# of Units	% of Universe
Bachelor	1,283	3.3%
1-Bedroom	10,286	26.6%
2-Bedroom	20,385	52.8%
3-Bedroom	6,556	17.0%
4+Bedroom	102	0.3%
Total	38,612	100.0%

As indicated by the above data, two bedroom units accounted for more than one half of the total survey universe while four+ bedroom units accounted for less than one half of one percent. Bachelor units had the highest vacancy rate (10.3%) and, discounting the 4+ bedroom units, the lowest vacancy rate (5.6%) was evident in the two bedroom units.

II: COMPARATIVE VACANCY RATES BY COMMUNITY, 1981 - 1990

This section presents a historical summary of the vacancy rates in the various municipalities since 1981. In 1990, five communities evidenced 10-year vacancy rate highs and another 23 had increases over those of 1989; 24 communities evidenced 10-year vacancy rate lows and 36 additional communities had decreases from their 1989 rates.

III: WEIGHTED AVERAGE RENTS BY BEDROOM TYPE AND OVERALL VACANCY RATES BY COMMUNITY 1981 - 1990

This section contains historical information on weighted average rent by bedroom type and overall vacancy rates by community.

IV: DETAILED 1990 SURVEY RESULTS BY COMMUNITY

This section presents detailed rental market information on each community surveyed. The information includes the estimated rental universe, the number of units surveyed, the survey response rate, rental costs by type of suite, and vacancy data by age and type of building and by type of suite.
